Industry Type

* Average calculated from August 2016 to August 2017. ** Geographic breakdown based on October 2017 issue circulation data.

Marketing Partnership

GCE Subsea and *OE* (*Offshore Engineer*) magazine are continuing a partnership to help showcase Norwegian subsea technology and expertise to the global market.

The sixth annual GCE Subsea Supplement, published in February, is the only annual international supplement focusing on Norway's world-class subsea cluster.

It is distributed to *OE*'s global readership, digitally and in print, as well as by GCE Subsea, and is taken to events including:

- Australasian Oil and Gas (Perth in March)
- Underwater Technology Conference (Bergen, June)
- OTC (Houston in May)
- Deepwater Intervention Forum (Galveston in August)
- Global FPSO Forum (Galveston in September)
- ONS (Stavanger in August)

To get your company featured, contact editor Elaine Maslin (emaslin@atcomedia.com). To advertise contact Brenda Homewood (bhomewood@atcomedia.com).

"As a Global Centre of Expertise it is very important to communicate the GCE Cluster worldwide. I therefore encourage all our partners and members to contribute to the next issue."

Owe Hagesæther, CEO, GCE Subsea
